Education

Northeastern University Boston, MA

Computer Science & Design at Khoury School of Computer Sciences *Aug. 2025 – May 2029*

- **Related Coursework**: Computer Systems, OOP, Programming C++, Creative Fabrication, Interactive Design

Certifications

USACO Silver (2023), Amateur Radio License (2026)

Experience

Embedded Software Intern Mar 2025 – Aug 2025

Shanghai Moocxing Technology Co., Ltd *Shanghai, China*

- Gained embedded systems experience testing and developing on custom RISC-V chips
- Helped debug and program device drivers and other software weekly

Penetration Testing Intern Jul 2024 – Aug 2024

Information & Data Security Solutions Co., Ltd *Shanghai, China*

- Studied at a web-security compnay learning valuable skills in cybersecurity and software security practices
- Researched and scanned for web vulnerabilities using an array of tools like

Embedded Software Intern Jun 2023 – Aug 2023

Shanghai Moocxing Technology Co., Ltd *Shanghai, China*

- Worked as a developer for student databses and visualization
- Help out in storage, front desk, and outreach events weekly

---

Main Organizer Sep 2025 – Present

Huntington Hackers, B40 Boston *Boston, MA*

- Organized for a hacker "hang out" that focuses on free and open source software, right to privacy, and unix operating systems
- Held and outreached for presentations, events, hackathons weekly
- Organized with B40 chapters all across America monthly

Club Member Sep 2025 – Present

W1KBN Northeastern Wireless Club *Boston, MA*

- Worked as facilities manager (Jan 2026 - May 2026), maintaining the club space, ordered and organized club materials and infrastructure, and collaborated with old and new members.
- Participate in amateur radio activities weekly, including parks on the air, contests, and casual communication across voice, digital, and morse code channels
- Gained over 150+ contacts (60+ confirmed), across all continents and 50+ countries, using FT8 digital radio technology

Projects

Distance Detection Program | *Python, ROS2, OpenCV, Mediapipe* Sep 2022 – Mar 2024

- Researched and developed weekly on a distance detection and object recognition system for airport trolleys
- Developed a regression model to determine the distance and general location of any object using two web cameras and OpenCV to run on real IoT hardware
- Approved Patent (number: CN221678736U)

Technical Skills

Software Tools: GNU/Linux, Bash, Arch, NixOS, Vim, Emacs, Git
Programming Languages: Rust, C++/C, Python, Markdown, Tex, Assembly x86, Go, Java, HTML/CSS, Lua
Embedded: ESP32, Raspberry Pi, RISC V, Arduino
Fabrication Tools: Soldering, 3d Printer, Resin Printer, Vinyl Cutter, Laser Cutter, CNC Machine, Bandsaw
AI Tools: Cursor, Claude Code, Ollama, RAG Models, Unsloth, Pytorch
Design Software: Fusion 360, Cavalry, GIMP (script), Inkscape, Illustrator, InDesign, Godot, Blender, Rhinoceres, Dreamweaver, Premiere Pro, Unity3d, Photoshop, Adobe Suite, Figma
